1. How to fill in this template

- **Pale yellow cells** are for you to complete.
- **Grey italic values** show what is configured today in the sandbox. Keep them, change them, or delete them.
- Tick ☐ the options that apply. Add rows wherever you need more levels.
- Targets are measured in **working time** on the calendar in section 2, unless you state otherwise.

> **Why levels matter:** one target for every report is simple, but most organisations want shorter targets for serious concerns (for example retaliation or fraud) and a staged escalation: a warning before the target, then escalation to a manager, then to a higher level if still unresolved.
